

GRAPHIC GLOSSY BACKLIT DISPLAY FILM

IGXGTF6 (180gsm)

ILFORD GALERIE GRAPHIC Glossy Backlit Display Film is a coated nanoporous film specifically for use in light boxes and other back-lit applications. It is compatible with aqueous pigment inks.

PRODUCT INFORMATION

The high opacity also gives the image excellent contrast when the image is not back lit, making it suitable for day and night applications.

FEATURES

- High colour saturation
- Homogeneous colour
- Fast drying
- High image quality
- Compatible with pigment inks
- For use in lightboxes

LAMINATION

For best results and longer exhibition life we strongly recommend that you laminate the image side of prints.

Touch dry straight from the printer it is recommended that prints are left to dry fully before laminating. As with other media, 24 hours dry time should be allowed for consistent results.

PRINTER & INK COMPATIBILITY

Designed for use with most wide format inkjet printer systems using aqueous pigment inks from major manufacturers.

AVAILABILITY

GALERIE GRAPHIC Glossy Backlit Display Film is available in selected roll widths, up to 44" (111.8cm).
